

14,632,791,946

# 14 Billion

*...and Counting*

That's the number of SuperFlash®-based products that have been shipped by SST and its licensees.

For more than two decades, thousands of customers worldwide have relied on SST's technology to make products that are more portable, consume less energy, have more reliable storage of digital media and are easier to use and operate.

From SuperFlash memory technology to RF and wireless ICs, SST provides customers with the solutions they need to develop products with unlimited possibilities.
